

## **JEREMIAH MWAURA MUIRURI**

P.O BOX 59857 00200 - Nairobi

+254 798 570 071

jeremiah.muiruri@strathmore.edu

### **Career Objective**

---

To obtain a position as an information security analyst, network security engineer, or similar role leveraging my skills in securing computer networks and systems against cyber threats as well as to continuously expand my skills and understanding of the latest technologies, regulations, and best practices related to computer and network security to combat the evolving cyber risks.

### **Educational Background**

---

|                    |                                                                                                                                |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>2021 - 2025</b> | <b>Strathmore University</b><br>Bachelor of Science in Computer Networks and Cyber Security<br>(Graduation expected June 2025) |
| <b>2017 – 2020</b> | <b>St. Anthony’s Boys High School</b><br>High School level of the 8.4.4 system Grade: B                                        |
| <b>2009 - 2016</b> | <b>Mount Elgon Academy</b><br>Primary School level of the 8.4.4 system Grade: B+                                               |

### **Experience**

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>IT Intern</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>January 2024 – March 2024</b> |
| <b><i>Naya Solutions Limited, Nairobi, Kenya</i></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                  |
| <ul style="list-style-type: none"><li>• Installed, configured, and troubleshoot networking equipment for clients, including routers and enterprise Wi-Fi systems.</li><li>• Gained experience in structured cabling, network configurations, and IT support.</li><li>• Worked across departments managing networks, servers, and client support.</li><li>• Strengthened troubleshooting skills and enhanced customer service through direct client engagement.</li><li>• Improved workflow efficiency by managing tasks in a ticket-based system and adhering to safety standards.</li></ul> |                                  |

### **Achievements**

---

- President’s Award Bronze Certificate
- First Aid Participation Certificate
- President’s Award Silver Certificate

## Skills

---

- Web Development
- Graphics Design
- Python Scripting
- Network Administration

## Projects

---

### Computer Networks and Security (CNS) Project 2

April 2024 – Nov 2024

**Title:** *Web Based Dynamic Malware Detection System*

The project's aim was to come up with a web application that can detect malware in executable files

### Computer Networks and Security (CNS) Project 1

April 2023 – July 2023

**Title:** *Uncovering Stealthy Threats: Convolutional Neural Networks for Steganalysis*

The project's aim was to develop a system utilizing convolutional neural networks for detecting malware concealed by steganography

## Other Courses

---

- Introduction to Cybersecurity (Cisco)
- AWS Academy Cloud Foundations
- IT Essentials (Cisco)
- Network Security (Cisco)
- Python Essentials (Cisco)

## Volunteering

---

### Christ is the Answer Ministry (CITAM) Valley Road

January 2023 – March 2023

## Hobbies and Interests

---

- Technology & IT: Exploring emerging tech and learning new programming languages.
- Fitness & Sports: Running and team sports.
- Creative Arts: Graphic design, and music.
- Community Engagement: Volunteering, and mentorship.
- Travel & Culture: Exploring new places and cooking.
